

EXHIBITION AND SPONSORING

We would like to extend an invitation to your company to be part of the 1st International Virtual Conference on CAE Interoperability from 19 – 20 October 2020. There are several outstanding opportunities available for your company to sponsor or exhibit at the virtual conference.

Interoperability is a significant topic for much of the Computer-Aided Engineering (CAE) simulation and analysis sector. Improving accuracy and speed in both product and process design is a constant requirement. A critical factor in this is enabling seamless collaboration between teams, often in different organizations, addressing different simulations and physics. This, however, presents a significant barrier.

The 1st International Virtual Conference on Interoperability, organized by the VMAP project, will discuss these issues and more. Focusing on the many aspects, problems and possible solutions in interoperability including software implementation, simulation process integration, data transfer, standards, ontologies, and collaboration, this will be the first independent, international gathering focusing solely on interoperability.

The 1st International Virtual Conference on CAE Interoperability provides an excellent opportunity for promotional and product / project awareness, and direct access to technology leaders.

We are looking forward to meeting you virtual.
